STUCK AT HOME CON 5!

Let's take it from the top:

Stuck At Home con is an online convention that was created by (and for) fans of the webcomic Homestuck, along with its other related properties (such as Hiveswap and Problem Sleuth!).

For Saturday (July 22nd), we host a large variety of panels that are run by multiple creative fans in the community. The topics and panel styles can range; the only limit is your imagination... and, like, linear time. And the limits of modern computing. And also the confines of the human mind. Okay, let's just go with the imagination thing!

Our con is run through our Discord server, where you can tune in to chat with other fans and get updates on the panels. We try to archive as many panels as possible for those who can't make it.

We have a cool Artist Alley found within our server, where you can check out what kind of arts and crafts our talented fan artists are selling at their booths!

And of course we have many other things going on: Our VRChat server, the nighttime rave, our Friday Showcase, and much more!

LETTER FROM THE CHAIR

Well, holy shit, we sure have been doing this for five years, huh?

It's genuinely inspiring (and a little mind-blowing) to think that SAHCon has been going for so long and continuing to pull in folks from across the fandom. We always imagined this as an inclusive, welcoming space for everyone to share their love of Homestuck, and after half a decade, I think we've managed to pull that off!

This wouldn't be possible without an incredible amount of effort and hard work from everyone involved. Even in a virtual space, organizing and executing a convention takes some doing, and that's not something that one or two folks can do alone!

As always, thanks so much to all the people who made this year possible - our panelists and special guests, our guest artists, the artist alley folks, our server staff, the VR Chat dev team, and of course the most important part of any con - you, the con-goer!

Have fun, be chill to each other, and have an awesome time together!

OUR MASCOTS

(art by _tamajikis)

DAYTAH WHYFYE is a yellow blood with a lot of time on her hands! Her lusus is a giant snail, and her likes include future bass music and cheese snacks. She dislikes having a slow wifi connection. As a streamer, she tries to keep up an optimistic energy when possible! Fun fact: She has never gone to a publicized convention before.

(art by _tamajikis)

POHHOW ERROHN is Daytah's neighbor. Their lusus is a venomous sea bunny. Pohhow's favorite activities include sleeping, binging DIY craft videos, staying up past ungodly hours, experimenting with faygo cocktails, and even more sleeping. They would consider themselves an artist of varying quality. Fun fact: They haven't gone to clown church in sweeps. Don't tell anyone.
